

Part Number: V-LX150-5

Description: Scooter Saddle

Fitment: Vespa LX 150

Revision: 1

Tools Required	Parts List
Phillip Screwdriver 10mm Open Wrench	2 6mm x 20 Hex Head Bolts 2 3/16" Flat Washers

NOTE: Lock mechanism and latch are preinstalled on the Corbin seat and integrate with your stock Vespa chassis (*Figure 1*). The supplied keys unlocks the saddle and allows it to hinge up and provide access to the storage area.

NOTE: Corbin seat installs easily with a new hinge included and preinstalled on the saddle. Mounts to stock location on your bike with new bolts supplied.

1. Simply remove the storage tray from under your seat and remove the two phillips head screws holding the seat hinge to the chassis. Now bolt the Corbin saddle in its place using the supplied hinge, bolts and washers (*Figure 2*). Replace the storage tray.

2. The seat will now hinge and latch just like the stock seat. Notice the Corbin latch bracket is adjustable to assure perfect alignment with the seat lock.

NOTE: Corbin saddle does not include rain cover like the stock unit.
