

Part Number: H-ST-13-SMUG

Description: Smuggler Trunk

Fitment: Honda ST 1300

Revision: 1

www.**corbin**.com

Tools Required	Parts List
None	1 Smuggler trunk 1 Latch bracket #A00019, preinstalled

NOTE: Corbin Smuggler trunk will work with the Corbin front saddle or your OEM front seat. Installation procedure is the same for either.

1. Smuggler trunk comes to you ready to install right out of the box. All brackets and tabs are premounted and designed in. They are:

Figure 1, A Smuggler mounting tabs

Figure 1, B Front seat hold down tab

Figure 1, C Smuggler locking latch

2. Remove your stock rear seat.

3. Assure your front saddle is mounted in your preferred height position.

4. Install the Smuggler trunk just like your stock rear seat with the tabs (Figure 1, A) inserting into the seat mounting locations on your chassis. Slide the trunk into place and align locking latch.

5. When positioned properly, the molded tongue on the Smuggler (Figure 1, B) will hold down the front seat tab and secure it in place.

6. Push down on the rear of the Smuggler until it latches in place. Until the rubber bumpers break in, it may be a little difficult to latch. In this case, open the Smuggler door and push down on the bottom of the trunk directly over the latch bracket.

Enjoy the ride!
